

aaa-diag-scripts

This repository contains various diagnostic scripts. Each folder includes detailed documentation and usage instructions.

How to Use

Each folder contains scripts and a corresponding README.pdf with detailed explanations. Navigate to the target folder and refer to the README.pdf for instructions. Example: The README.pdf file in the check-domains folder. Ensure that you review the respective README.pdf before proceeding with any script execution.

Folder Structure

- check-domains
 - Contains scripts for domain checks.
- check-license
 - Contains scripts for license server connection.
- check-quota
 - Contains scripts for quota verification.

Important Notes

Before using any script in this repository, make sure to read the README.pdf file in the respective folder and follow the instructions carefully.
